Personalizza le luci del cruscotto e della strumentazione

Con le lampade T5 sarà possibile cambiare l'illuminazione della strumentazione e con le lampade B8.5d sarà addirittura possibile cambiare il colore di tutto ciò che si illumina grazie ad un circuito stampato come, ad esempio, il tachimetro o il contagiri.

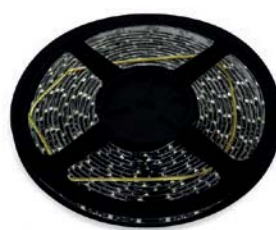

Grazie al sistema waterproof, le strip LED possono essere installate sia all'interno che all'esterno del veicolo.

Strisce LED 12/24 Volt
